

# CHRISTOPHER SNYDER

FULL-STACK WEB DEVELOPER

KBrMA@arll.net (603) 770-6389

## Profile

Enjoys the ever-evolving landscape of the modern world wide web. Discovering exciting and effective ways of leveraging new technologies and techniques to create effective user experience while alleviating design constraint.

## Skills

### Front-End Development

Translating mock-ups to tested, accessible and semantic markup and styling.

```
// Front-End Resources
const resources = ['Javascript', 'React', 'Webpack', 'Babel', 'Redux', 'NextJS', 'Gatsby', 'React Testing Library',
  'Jest', 'Mocha', 'Chai', 'Git', 'VSCode', 'Cypress', 'Selenium'];
```

### Back-End Development

Building REST/GraphQL services to drive and populate rich frontend applications.

```
// Back-End Resources
$resources = ['NodeJS', 'NPM/Yarn', 'MySQL', 'AWS', 'Azure', 'PostgreSQL', 'Git'];
```

### System Administration/DevOps

Configuration and deployment of software stacks and containerization of services.

```
# Administration Tools & Software
tools = ['Bash', 'Docker', 'Kubernetes', 'Pivotal Cloud Foundry', 'Alpine', 'Debian', 'Nginx', 'Varnish',
  'PostgreSQL', 'MongoDB', 'AWS', 'Azure']
```

## Experience Liberty Mutual

### Senior Software Developer

**Mar 2017 - Present**

Designed and built fully automated end-to-end testing suite leveraging continuous integration pipelines to ensure business rules are adhered to across browser vendors. Rearchitected a portion of libertymutual.com to utilize server rendered React via NextJS while maintaining the speed of a single-page app with fast and efficient client-side routing.

### Liberty Mutual

#### Software Developer

**June 2016 - Mar 2017**

Maintained and developed new pages and features for libertymutual.com. Designed and implemented HTTP caching strategy for improved page load performance for an improved user experience and decreased origin server load. Bridged vendor gaps to design and implement a continuous integration and deployment pipeline for automated and auditable code deployments to a vendor hosted cloud environment.

### Matter Communications

#### Web Developer

**January 2014 - 2016**

Develop site designs based on mock-ups provided as Photoshop, Illustrator and Sketch files with involvement from initial brainstorm to final site launch. Sites varying in complexity from static single page parallax microsites to fully featured custom Wordpress themes. Provide one-on-one Wordpress CMS training post launch to clients. Contribute to proposals and RFP responses and accompany account teams to new business pitches.

## Education

### Fitchburg State University

B.S. Communications Media/Film Production

**2006-2010**
